Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. This application has been examined. Claims 1-9 are pending in this application.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-4 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Reichardt et al. (USPN 6,000,969).

As per above claims, Reichardt discloses a contact assembly comprising a dielectric mounting block (26) having inner and outer faces; and a conductive contact (10) unitarily formed of elastically deformable metal with a center web (16) set in the block, an inner leg (12), and outer leg (14); wherein the contact is formed with inner and outer u-shaped bights (loop-shape, 20) connecting the respective legs to the web; wherein the block is formed on the outer face with an abutment (not shown, fig. 2) the outer leg having a tip (24) bearing outward on the abutment (fig.2); wherein the bights are at opposite ends of the web (fig. 1); wherein the legs extend oppositely toward each other from the respective bights (fig.1).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2833

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reichardt et al. in view of Bechaz et al. (USPN 6,196,883).

As per above claims, Reichardt does not explicitly teaches that the web is formed with a cutout thru which the tip passes on. Reichardt does teach a notch (punched out 18). Further, Bechaz teaches an opening (18) to allow the passage of the end of the conductor (figs. 4-5). Therefore, it would have been obvious to one skilled artisan at the time the invention was made to include the teaching of Bechaz in the Reichardt assembly in order to allow the free ends of the conductor to pass on.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday from 9:30AM to 1:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley, can be reached on (571) 272-2800 extension 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
